Shape

Definition:

global color=green dash=0 dashlist=83 delete=1 edit=1 fixed=0 font="helvetica 10 normal" highlite=1 include=1 move=1 rotate=1 select=1 source=1 width=1
image; ellipse(100.000000i,200.000000i,30.000000i,20.000000i,0.000000)

- something else: create/write

- viewer ShapeManager: create/modify/display/read/write
- does not use mouse tool, uses edit box etc

- Annotators (text, arrow, line, closed region)
- Pure geometric properties (for display)
- In file: ds9 or cara-xml
