Subject: older users, affiliations

```
Found a bug with the query servlet. Pick an older user (I tried
myself, Bryan Butler and Lori Appel), the XML returned for their
affiliation is:

<nrao:affiliation-info>
<nrao:default-affiliation>
<nrao:formal-name>Unknown</nrao:formal-name>
</nrao:default-affiliation>
</nrao:affiliation-info>

This doesn't jive with what the GUI displays which might be right.

If they reset their affiliation in the GUI, the servlet returns
properly (as it did for me):

<nrao:affiliation-info>
<nrao:default-affiliation id="7">
<nrao:formal-name>National Radio Astronomy Observatory </nrao:formal-name>
</nrao:default-affiliation>
<nrao:additional-affiliation id="241">
<nrao:formal-name>Max-Planck-Institut f?r Radioastronomie</nrao:formal-name>
</nrao:additional-affiliation>
</nrao:affiliation-info>
